AI Security Stack Ranking: KuppingerCole Vendors

Module evidence by vendor

What each vendor has, and lacks, against the AccuKnox benchmark. Vendors 1 to 4 of 21, ordered by rank.

Vendor	1 AI-SPM AI inventory, shadow AI, pipeline posture	2 Agentic AI Security Managed agents, MCP, agent sandbox	3 AI-DR Detect, respond, block at runtime	4 Prompt Guardrails & AI Gateway Inline firewall, injection and PII, unsafe output	5 Compliance and AI-GRC AIBOM, framework mapping, audit trail	6 Red Team + AI DAST Attack library, live multi-turn attacks, CI/CD	7 AI & Agent Identity Security Agent identity, least privilege, NHI	8 Model, Dataset + AI-SAST Model files, datasets, AI code scanning
AccuKnox #1 7.5 / 8 Zero trust AI security platform, from AI-SPM to runtime, plus the AgentZ agentic platform.	Supported **Has:** AI-SPM on AWS, Azure, GCP, on-prem. Shadow AI on browsers, hosts, clusters, CLI.	Supported **Has:** AgentZ default-deny sandbox. Copilot Studio, M365, AI Foundry, Bedrock AgentCore agents.	Supported **Has:** AI-DR on CloudTrail and Event Hub. Jira, ServiceNow, auto-remediation. KubeArmor blocking.	Supported BETA **Has:** Stateful Prompt Firewall in browser, gateway, SDK, LiteLLM and Bifrost.	Supported **Has:** CycloneDX AIBOM. Maps to NIST AI RMF, ISO 42001, OWASP LLM, EU AI Act.	Supported BETA **Has:** Static and purpose-built red-team scans on a schedule. DAST behind MFA logins.	Partial BETA **Has:** SPIFFE agent identity, OpenFGA authorization per step, scoped runtime credentials. **Lacks:** Per-agent identity and authorization are in beta.	Supported BETA **Has:** Scans Pickle, GGUF, safetensors, ONNX, also in CI/CD. Dataset PII and poisoning checks.
Microsoft #2 5.5 / 8 AI security across Defender, Purview, Entra, Foundry and Agent 365 for models, apps and agents.	Supported **Has:** Defender CSPM AI-SPM with AI BOM. Agent 365 and Purview DSPM find shadow AI.	Supported **Has:** Agent 365, Defender real-time protection, Tools registry, Foundry hosted agents, Windows 365 for Agents.	Partial **Has:** Defender XDR AI agent detections, Defender for Cloud AI alerts, Sentinel, BehaviorInfo automation. **Lacks:** Blocking covers tool calls and prompts. Endpoint agent blocking is preview.	Partial **Has:** Foundry guardrails, Prompt Shields, Content Safety API, Purview DLP and browser extension. **Lacks:** PII blocking sits in Purview DLP, mainly prompts. Groundedness and agent guardrails are preview.	Partial **Has:** Compliance Manager AI templates, Defender AI BOM, Purview Audit. **Lacks:** AI BOM export in a standard format such as CycloneDX not documented.	Partial **Has:** Foundry AI Red Teaming Agent with Crescendo, multi-turn and agent risk tests. PyRIT. **Lacks:** Framework-mapped findings not documented. Cloud red teaming limited to five regions.	Supported **Has:** Entra Agent ID, Conditional Access for agents, Defender non-human identity inventory.	Partial **Has:** Defender model scanning (preview), Purview data classification, GitHub Copilot Autofix. **Lacks:** Preview, Azure ML only, weekly. Poisoning checks and LLM-risk code scanning not found.
Palo Alto Networks #2 5.5 / 8 Security vendor selling Prisma AIRS for AI, Cortex Cloud AI-SPM and Idira agent identity.	Supported **Has:** Cortex Cloud AI Security, AI Access Security, Cortex AES and AI Agent Discovery.	Partial **Has:** SaaS Agent Security (10 platforms), AI Gateway MCP registry, Cortex AES endpoint hooks. **Lacks:** Tool-call policy at gateway and endpoint hooks. No host or kernel sandbox found.	Partial **Has:** Cloud AI Infrastructure Analytics alerts, AIRS runtime blocking, XSIAM and AgentiX response. **Lacks:** No AI-specific host process or file blocking documented.	Supported **Has:** AI Gateway (GA July 2026), API Intercept, Network Intercept, Prisma Browser extension.	Partial **Has:** Cortex Cloud AI Security framework checks. Model Security reports and audit logs. AI-BOM tracking. **Lacks:** No exportable AIBOM format such as CycloneDX found.	Partial **Has:** Prisma AIRS AI Red Teaming: 500+ attacks, agent targets like Copilot Studio, n8n. **Lacks:** Scheduled or CI/CD runs not confirmed in docs.	Supported **Has:** Idira Secure AI Agents: registry, Agent Identity Broker, kill switch. Idira secrets management.	Partial **Has:** AI Model Security (Protect AI), 50+ formats, PII tagging on datasets, CLI gate. **Lacks:** No native SAST. Dataset poisoning scans and agent code scanning unconfirmed.
Cisco #4 5 / 8 Enterprise AI security: asset discovery, model scanning, red teaming, runtime guardrails and agent identity.	Partial **Has:** AI Inventory, cisco-aibom CLI, Secure Access AI Access for shadow AI. **Lacks:** Docs list AWS discovery in beta. Network-only shadow AI. No cloud misconfiguration checks.	Partial **Has:** MCP Catalog, MCP scanning, runtime allow and block lists. Agent SDK for three platforms. **Lacks:** No agent sandbox. Tool-call policy runs at a proxy, not the host.	Partial **Has:** Splunk and ServiceNow AI Control Tower integrations. Inline block of prompts and tool calls. **Lacks:** No control-plane log detection or auto-remediation workflow. Blocks at network, not host.	Supported **Has:** AI Runtime via API, SDK, gateway, LiteLLM, Multicloud Defense. PII, injection, code, safety rules.	Partial **Has:** Standards mappings to OWASP, NIST, MITRE. PDF scan reports. cisco-aibom CLI. **Lacks:** AIBOM output documented as JSON or text. CycloneDX or SPDX not documented.	Supported **Has:** AI Red Teaming (ex-Validation): 200+ techniques, multi-turn, agents, scheduled and CI/CD runs.	Partial **Has:** Duo Agentic Identity per-tool authorization. Astrix NHI discovery for keys, service accounts, OAuth. **Lacks:** Per-agent cryptographic credential not documented. Duo link to AI Defense is coming soon.	Partial **Has:** Model Scanning for 10 format families, MCP Scanner, cisco-aibom source analysis. **Lacks:** Dataset PII scanning not documented. No general LLM-risk code scanner.

AI Security Stack Ranking: KuppingerCole Vendors

Module evidence by vendor

What each vendor has, and lacks, against the AccuKnox benchmark. Vendors 5 to 8 of 21, ordered by rank.

Vendor	1 AI-SPM AI inventory, shadow AI, pipeline posture	2 Agentic AI Security Managed agents, MCP, agent sandbox	3 AI-DR Detect, respond, block at runtime	4 Prompt Guardrails & AI Gateway Inline firewall, injection and PII, unsafe output	5 Compliance and AI-GRC AIBOM, framework mapping, audit trail	6 Red Team + AI DAST Attack library, live multi-turn attacks, CI/CD	7 AI & Agent Identity Security Agent identity, least privilege, NHI	8 Model, Dataset + AI-SAST Model files, datasets, AI code scanning
CrowdStrike #4 5 / 8 Endpoint, cloud and identity platform with Falcon Guardian (AIDR), AI-SPM and Charlotte AI.	Supported **Has:** Falcon Cloud Security AI-SPM, Exposure Management AI Discovery, Falcon Shield, Guardian agent discovery.	Partial **Has:** AIDR MCP Proxy, Copilot Studio collector, Falcon Shield agent discovery, Guardian agent allowlist. **Lacks:** Two named managed agent platforms. Allow and block controls, no host sandbox.	Supported **Has:** Falcon Guardian runtime blocking, Bedrock log collector, Next-Gen SIEM, Fusion SOAR agent suspend.	Partial **Has:** AIDR via browser extension, SDK, gateway collectors and MCP Proxy. 12 detectors. **Lacks:** No hallucination filter found. Toxicity filter not in detector list.	Partial **Has:** AI-SPM model and package inventory. AIDR policy audit log and runtime event logs. **Lacks:** No AI framework mapping, AIBOM export or compliance reports found.	Partial **Has:** AI Red Team Services: human-led LLM application tests and adversary emulation for AI. **Lacks:** Service, not a product. No automated attack library or CI/CD red teaming found.	Partial **Has:** Agentic IdP (announced), Continuous Identity from SGNL, Next-Gen Identity discovery of non-human identities. **Lacks:** Agentic IdP carries an unreleased-features disclaimer. No distinct per-agent credential confirmed.	Partial **Has:** Cloud Security AI model scanning, AI data flow discovery (beta), FAIRR code scanning service. **Lacks:** Model formats not named. No dataset poisoning scans. No AI SAST product.
NeuralTrust #4 5 / 8 AI agent security platform: agent gateway, runtime guardrails, agent posture and red teaming.	Partial **Has:** TrustLens inventories agents in cloud, SaaS, endpoints and browser. **Lacks:** No named multi-cloud plus Kubernetes inventory. No CI/CD posture checks.	Partial **Has:** TrustGate MCP and A2A gateway. Copilot Studio governed tool access. **Lacks:** One managed agent platform, Copilot Studio. Tool hooks, not a sandbox.	Partial **Has:** TrustGuard blocks inline and sends alerts to Sentinel, Splunk and QRadar. **Lacks:** No control-plane log detection. Blocks prompts and tool calls, not hosts.	Supported **Has:** TrustGuard via gateway, SDK, browser extension, LiteLLM, Kong and Azure APIM.	Partial **Has:** Docs map controls to EU AI Act, ISO 42001, NIST AI RMF and OWASP. **Lacks:** No AIBOM export found.	Supported **Has:** TrustTest runs automated attacks on models, agents and APIs and gates CI.	Partial **Has:** TrustGate enforces per-agent and per-tool RBAC with Entra ID and Okta. **Lacks:** Agents act under forwarded user identity. Partial NHI governance.	Partial **Has:** Model Scanner flags unsafe pickle opcodes and deserialization. **Lacks:** Thin dataset scanning. MCP Scanner tests live endpoints, not source.
Check Point #7 4.5 / 8 Check Point AI Security: Workforce AI Security, AI Agent Security with AI Guardrails, and AI Red Teaming.	Partial **Has:** Agent Discovery, Agent Risk Assessment, Workforce AI Security shadow AI discovery. **Lacks:** No Kubernetes or on-prem inventory found.	Partial **Has:** Agent Discovery, MCP server risk flags, Tool Allow/Deny List. **Lacks:** No agent sandbox. Tool allow lists at the Guard API only.	Partial **Has:** AI Guardrails Enforce mode, Dangerous Deviation detector (beta), S3 log export. **Lacks:** No named SIEM or ITSM. No control-plane log detection. Blocks calls, not hosts.	Partial **Has:** Guard API, Workforce browser extension, AI gateway pattern. Content moderation. **Lacks:** No hallucination or harmful code filtering found.	Partial **Has:** Framework mapping, audit trail, compliance reporting, agent inventory. **Lacks:** No AIBOM export. No ISO 42001 or EU AI Act mapping found.	Supported **Has:** AI Red Teaming platform and SDK with CI/CD gate, recurring replay, OWASP mapping.	Partial **Has:** Tool Allow/Deny List. Risk flags for static credentials and OAuth gaps. **Lacks:** No per-agent cryptographic identity. No NHI governance product published.	Partial **Has:** AI Guardrails screening of RAG content and tool responses. **Lacks:** No model file scanner. No dataset PII or poisoning scan. No AI SAST.
F5 #7 4.5 / 8 AI Security Platform: Guardrails, Red Team, AI Gateway with MCP gateway, Workforce AI Security.	Partial **Has:** Workforce AI Security (SurePath AI) passive network discovery of AI apps, models, MCP servers. **Lacks:** Network-only discovery. No cloud-account inventory, endpoint or browser discovery, or AI posture checks.	Partial **Has:** MCP Gateway with server registry and per-tool allow lists. Google Agent Gateway integration. **Lacks:** Early-access sign-up still listed for AI Gateway. One named agent platform. No sandbox.	Partial **Has:** Audit logs and SIEM export. Fail-closed inline blocking. AI Remediate pushes findings to guardrails. **Lacks:** No named SIEM or ITSM integration found. Blocks prompts and tool calls, not hosts.	Supported **Has:** AI Guardrails: SaaS API and SDK, AI Gateway, NGINX Gateway Fabric, Google Agent Gateway.	Partial **Has:** Audit logs, EU AI Act and GDPR templates, OWASP LLM Top 10 reports. **Lacks:** No AIBOM export. NIST AI RMF, ISO 42001, MITRE ATLAS mapping not found.	Supported **Has:** AI Red Team: 10,000+ monthly attack patterns, agentic warfare, API and SDK, CI/CD re-testing.	Partial **Has:** AI Gateway RBAC with per-tool allow and deny lists and a central agent registry. **Lacks:** No per-agent cryptographic identity. No API key, service account or OAuth grant discovery found.	No evidence **Lacks:** No model scanner, dataset checks or AI SAST in F5 AI Security Platform pages.

AI Security Stack Ranking: KuppingerCole Vendors

Module evidence by vendor

What each vendor has, and lacks, against the AccuKnox benchmark. Vendors 9 to 12 of 21, ordered by rank.

Vendor	1 AI-SPM AI inventory, shadow AI, pipeline posture	2 Agentic AI Security Managed agents, MCP, agent sandbox	3 AI-DR Detect, respond, block at runtime	4 Prompt Guardrails & AI Gateway Inline firewall, injection and PII, unsafe output	5 Compliance and AI-GRC AIBOM, framework mapping, audit trail	6 Red Team + AI DAST Attack library, live multi-turn attacks, CI/CD	7 AI & Agent Identity Security Agent identity, least privilege, NHI	8 Model, Dataset + AI-SAST Model files, datasets, AI code scanning
A10 Networks #9 4 / 8 Network security vendor. Owns TrojAI by A10 for AI red teaming and runtime defense.	Partial **Has:** TrojAI model registry, Defend for MCP discovery and Defend for Employee Usage. **Lacks:** No cloud account inventory, endpoint or CLI agent discovery, or cloud AI misconfiguration checks.	Partial **Has:** TrojAI Defend for MCP registry, tamper detection and blocking. Agent execution trace analysis. **Lacks:** No managed agent platform connectors found. No host sandbox, only tool and server controls.	Partial **Has:** Defend blocks, flags or redacts in real time. SIEM, SOAR and ticketing streaming. **Lacks:** No cloud control-plane logs. No named SIEM or ITSM product. Blocks prompts, not hosts.	Partial **Has:** Defend reverse proxy, TrueFoundry gateway integration, employee browser monitoring and A10 AI Firewall. **Lacks:** Output filtering covers toxic content only. No hallucination or harmful-code filter found.	Partial **Has:** Framework-mapped findings, MCP audit trails and a model registry. **Lacks:** No AIBOM export. Compliance report export not documented.	Supported **Has:** TrojAI Detect: 150+ attacks, multi-turn and agentic simulation, JFrog Artifactory integration.	Partial **Has:** Virtual keys with budgets and rate limits. MCP server and tool approval registry. **Lacks:** No per-agent cryptographic identity, per-tool least privilege or NHI discovery.	No evidence **Lacks:** No pickle, ONNX or GGUF scanner, dataset PII or poisoning scan, or AI SAST.
Adversa AI #9 4 / 8 Continuous AI red teaming plus a runtime security platform for coding agents.	Partial **Has:** Connected AI asset list in the red teaming console. **Lacks:** No cloud or Kubernetes discovery. No shadow AI detection. No posture checks.	Partial **Has:** Agent security gateway watches tool and MCP calls. Red teaming tests MCP. **Lacks:** No named managed agent platforms. No MCP discovery. No sandbox.	Partial **Has:** AIDR behavior graph, endpoint sensors, SIEM-ingestible event stream. **Lacks:** Early access. No named SIEM or ITSM. Blocks at gateway, not host.	Partial **Has:** Agent security gateway with 300+ default policies. Reads from existing gateways. **Lacks:** Early access. No toxicity or hallucination output filtering. No browser extension.	Partial **Has:** Compliance reports mapped to eight frameworks. Exportable evidence bundles. **Lacks:** No AIBOM or model inventory export.	Supported **Has:** Agentic AI red teaming platform. Static, mutated and AI-generated attacks.	Partial **Has:** Policies per team and environment, such as blocking agent access to AWS. **Lacks:** No per-agent cryptographic identity. No NHI discovery.	No evidence **Lacks:** No model scanner. No dataset scanner. No AI SAST.
NSFOCUS #9 4 / 8 Chinese security vendor with NSFAIS suite: AI-SCAN, AI-UTM, AI Guardrails, AI-DR and AI red teaming.	Partial **Has:** AI Agent Asset and Risk Governance System, AI-SCAN host and component vulnerability scanning. **Lacks:** No stated multi-cloud inventory. No CI/CD checks. Shadow AI evidence is thin.	Partial **Has:** Agent runtime protection blocks unauthorized MCP and tool access. AI-DR released September 2026. **Lacks:** No named managed agent platforms. No host or kernel sandbox.	Partial **Has:** AI-DR and agent runtime protection detect and block unauthorized agent actions. **Lacks:** No cloud control-plane log source, named SIEM or ITSM integration, or host blocking.	Partial **Has:** AI-UTM gateway, AI Guardrails, three-level content filter and DLP above 99% accuracy. **Lacks:** Gateway and reverse-proxy modes only. Output filter covers illegal content, not hallucination or code.	Partial **Has:** AI-SCAN risk reports, OWASP LLM assessment, AI-SBOM guidance, AI-UTM full-link audit. **Lacks:** No product AIBOM export. NIST, ISO 42001 and EU AI Act mapping not shown.	Partial **Has:** AI-SCAN attack library and AI Red Team Assessment and Continuous Validation Platform. **Lacks:** No scheduled or CI/CD runs documented. Framework mapping limited to OWASP LLM Top 10.	Partial **Has:** AI-DR agent identity and permissions, gateway key and token control, plaintext credential detection. **Lacks:** No per-agent cryptographic identity. No per-tool policy detail. NHI governance limited.	Partial **Has:** AI-SCAN model backdoor scan, 3,000+ component vulnerabilities and OpenClaw skill AST scan. **Lacks:** Only .pb and .h5 formats named. Dataset checks and AST scope are limited.
Skyhigh Security #9 4 / 8 Data-first SSE, CASB and DLP platform with Skyhigh AI controls for AI app usage.	Partial **Has:** Skyhigh AI discovers shadow and private AI apps with risk scores. **Lacks:** Network and web discovery only. No AI cloud resource posture or CI/CD checks.	Partial **Has:** Skyhigh AI scans Copilot and ChatGPT Enterprise prompts and responses. **Lacks:** No MCP discovery or policy. No agent sandbox. No agent platform coverage.	Partial **Has:** UEBA on AI app activity and inline prompt blocking in Skyhigh SSE. **Lacks:** No AI control-plane log detection. No host-level blocking. Named SIEM link not shown.	Partial **Has:** Skyhigh Web DLP on prompts. SSE proxy, Secure Browser Controls, Copilot API. **Lacks:** Prompt injection not named. Output filtering unclear. No SDK or LLM gateway.	Partial **Has:** AI app risk registry. Compliance dashboard. NIST AI RMF alignment guidance. **Lacks:** No AIBOM export. One framework, in a blog. No AI-specific report export found.	Partial **Has:** Red teaming listed under Skyhigh AI for private AI apps. **Lacks:** No documented attack library. No multi-turn attacks. No CI/CD runs.	Partial **Has:** Skyhigh CASB OAuth app discovery. Access control to AI apps. **Lacks:** No agent identity. No per-agent or per-tool authorization. NHI limited to OAuth.	Partial **Has:** Skyhigh DSPM classifies sensitive data across cloud, SaaS and AI stores. **Lacks:** No model file scanning. No poisoning checks. No AI SAST.

AI Security Stack Ranking: KuppingerCole Vendors

Module evidence by vendor

What each vendor has, and lacks, against the AccuKnox benchmark. Vendors 13 to 16 of 21, ordered by rank.

Vendor	1 AI-SPM AI inventory, shadow AI, pipeline posture	2 Agentic AI Security Managed agents, MCP, agent sandbox	3 AI-DR Detect, respond, block at runtime	4 Prompt Guardrails & AI Gateway Inline firewall, injection and PII, unsafe output	5 Compliance and AI-GRC AIBOM, framework mapping, audit trail	6 Red Team + AI DAST Attack library, live multi-turn attacks, CI/CD	7 AI & Agent Identity Security Agent identity, least privilege, NHI	8 Model, Dataset + AI-SAST Model files, datasets, AI code scanning
Straiker #9 4 / 8 Agentic AI security: agent discovery, autonomous red teaming, and runtime guardrails for AI agents.	Partial **Has:** Discover AI inventories AgentCore, Foundry, Copilot Studio agents and endpoint shadow AI. **Lacks:** No on-prem or Kubernetes inventory.	Partial **Has:** Covers AgentCore, Foundry, Copilot Studio, Agentforce. MCP discovery and blocking. **Lacks:** Kill switch cuts tool access. No host-level sandbox.	Partial **Has:** Defend AI detects and blocks agent attacks from traces. **Lacks:** No control-plane detection. No named SIEM. Hook-level blocking only.	Partial **Has:** Defend AI blocks injection and PII, filters toxic and ungrounded output. **Lacks:** Hook-based API and SDK only. No gateway or browser mode.	Partial **Has:** Maps EU AI Act, NIST AI 600-1, MITRE ATLAS with audit traceability. **Lacks:** No exportable AIBOM.	Supported **Has:** Ascend AI runs continuous multi-turn red teaming with CI/CD hooks.	Partial **Has:** Discover AI flags over-permissioned agents. Kill switch revokes tool access. **Lacks:** No per-agent identity. No per-tool authorization. No NHI governance.	No evidence **Lacks:** No model file scanning, dataset scanning or AI SAST.
Varonis #9 4 / 8 Data security vendor with the Atlas AI security platform, from the AllTrue.ai acquisition.	Partial **Has:** Atlas AI Inventory and AI-SPM scan cloud, repos, SaaS. Hooks for Cursor, Claude Code. **Lacks:** On-prem and Kubernetes inventory not found. No browser-based shadow AI discovery found.	Partial **Has:** Atlas MCP discovery and tool-call blocking, Agent IBAC, coverage pages for four agent platforms. **Lacks:** Inline tool-call gating through hooks and gateway. No host sandbox found.	Partial **Has:** Atlas AIDR, inline blocking, identity quarantine, SIEM and SOAR integrations. **Lacks:** Named Atlas SIEM or ITSM connectors not documented. Blocks prompts and tool calls only.	Partial **Has:** Atlas AI Gateway and runtime hooks for Cursor and Claude Code. Customer-owned data plane. **Lacks:** No AI-prompt browser extension found. Toxicity and hallucination filters not documented.	Partial **Has:** Atlas AI Compliance Management, audit-ready reports, lineage graphs, AI TPRM ingests vendor AIBOMs. **Lacks:** No exportable AIBOM of its own found.	Partial **Has:** Atlas AI Pen Testing covers injection, jailbreak, policy bypass. Results feed runtime guardrails. **Lacks:** CI/CD gating and framework-mapped findings not documented.	Partial **Has:** Agent IBAC (shipped Aug 2026), identity quarantine, service and non-human account classification. **Lacks:** No per-agent credential or API key and OAuth grant governance documented.	Partial **Has:** Atlas AI-SPM model artifact checks, malicious skill detection, Databricks training data classification. **Lacks:** Model file formats not named. No poisoning scans. AI code analysis not detailed.
Zenity #9 4 / 8 Security and governance platform for AI agents across SaaS, cloud and endpoints.	Partial **Has:** AI Observability inventories agents on Bedrock, Vertex, Foundry, SaaS and endpoints. **Lacks:** No on-prem host or Kubernetes inventory. No CI/CD checks.	Partial **Has:** Covers Copilot Studio, Agentforce, Bedrock and Foundry. MCP gateway and Boundaries. **Lacks:** Boundaries control tool calls. No host or kernel sandbox.	Partial **Has:** AIDR detects multi-step attacks and blocks inline. ServiceNow SecOps remediation. **Lacks:** Blocks tool calls and actions, not host processes or network.	Partial **Has:** AIDR and Inline Prevention block injection and data leaks. Risk Filtering. **Lacks:** Output filtering covers toxicity only. No hallucination control.	Partial **Has:** Audit trails and mapping to OWASP LLM, MITRE ATLAS and NIST. **Lacks:** Agent inventory has no AIBOM export.	Partial **Has:** AI Exposure Management validates which agent attack paths are reachable. **Lacks:** No automated attack library or scheduled red-team runs.	Partial **Has:** Agentic Identity maps Okta and Entra identities, flags NHIs, enforces scope. **Lacks:** No distinct cryptographic identity per agent. Builds on existing IdP identities.	Partial **Has:** AI-assisted development page scans AI-generated code. **Lacks:** No model file or dataset scanning.
Forcepoint #16 3.5 / 8 Data security vendor: DSPM, DLP and a 2026 AI Data Security platform with AI Agent Gateway.	Partial **Has:** AI Data Security shadow AI discovery. Agent registry in AI Agent Gateway. **Lacks:** No AWS, Azure, GCP AI resource inventory. No AI posture or CI/CD checks.	Partial **Has:** AI Agent Gateway: agent registry, tool-level scope, approval gates, MCP brokering. **Lacks:** No MCP server discovery shown. No host sandbox. Only Copilot and Bedrock named.	Partial **Has:** AIDR via Claude, ChatGPT, Copilot, Bedrock connectors. Block and SIEM escalation. **Lacks:** No attack detection on AI apps. No named SIEM. No host-level blocking.	Partial **Has:** Inline DLP for AI, API connectors, endpoint control and AI Agent Gateway. **Lacks:** No prompt injection or jailbreak blocking. No toxicity or hallucination filters. No SDK.	Partial **Has:** AI Agent Gateway immutable audit trail with CSV, JSON, PDF export. Registry of agents. **Lacks:** No AIBOM export in CycloneDX. No ISO 42001 or OWASP mapping found.	No evidence **Lacks:** No attack library, no multi-turn attacks, no CI/CD red teaming of its own.	Partial **Has:** AI Agent Gateway: per-tool scope, brokered short-lived credentials, over-permissioned agent flagging. **Lacks:** No SPIFFE-style cryptographic agent identity. NHI limited to agents, not keys or accounts.	Partial **Has:** Forcepoint DSPM classifies PII in data stores AI can reach. 2,000+ classifiers. **Lacks:** No model file scanning. No poisoning detection. No AI SAST.

AI Security Stack Ranking: KuppingerCole Vendors

Module evidence by vendor

What each vendor has, and lacks, against the AccuKnox benchmark. Vendors 17 to 21 of 21, ordered by rank.

Vendor	1 AI-SPM AI inventory, shadow AI, pipeline posture	2 Agentic AI Security Managed agents, MCP, agent sandbox	3 AI-DR Detect, respond, block at runtime	4 Prompt Guardrails & AI Gateway Inline firewall, injection and PII, unsafe output	5 Compliance and AI-GRC AIBOM, framework mapping, audit trail	6 Red Team + AI DAST Attack library, live multi-turn attacks, CI/CD	7 AI & Agent Identity Security Agent identity, least privilege, NHI	8 Model, Dataset + AI-SAST Model files, datasets, AI code scanning
PlainID #16 3.5 / 8 Runtime authorization platform for humans, non-human identities and AI agents, MCP tools and RAG.	Partial **Has:** Platform Discover pillar finds agents, MCP tools, resources. AgentCore and Foundry agent discovery. **Lacks:** No AI cloud resource inventory. No endpoint shadow AI scan. No CI/CD checks.	Partial **Has:** MCP Guardrail, native MCP Gateway, AI-Ready Gateway Enforcement, AgentCore and Foundry support. **Lacks:** No agent sandbox. Two named managed platforms. Authorization only, no host isolation.	Partial **Has:** Runtime deny of prompts and tool calls. Authorization telemetry to SIEM. Zero standing privileges. **Lacks:** No attack or anomaly detection. No named SIEM or ITSM. No host-level blocking.	Partial **Has:** Input and output guardrails. Gateway, framework and Kong, Apigee, Envoy enforcement. **Lacks:** No injection or jailbreak detection. No toxicity or hallucination filters. No browser extension.	Partial **Has:** Authorization audit and insights. Policy360 graph of agents, tools and data. **Lacks:** No AIBOM export. No in-product framework mapping or report export found.	No evidence **Lacks:** No attack library, no multi-turn attacks, no CI/CD red teaming.	Partial **Has:** Per-tool and parameter policy, composite user-agent identity, just-in-time access, agent registry. **Lacks:** No own agent credential. No API key or secret vaulting or rotation.	Partial **Has:** Data Retrieval Guardrail filters RAG and vector store access by policy. **Lacks:** No PII or poisoning scans of datasets. No model scanning. No AI SAST.
Cequence Security #18 3 / 8 API security vendor with AI Gateway for agent containment, MCP governance and runtime guardrails.	Partial **Has:** AI Discovery in AI Gateway inventories shadow agents, MCP servers and LLMs. **Lacks:** No cloud AI asset inventory, shadow AI on endpoints or AI pipeline posture.	Partial **Has:** MCP registry, Agent Personas and Agent Behavior Protection in Cequence AI Gateway. **Lacks:** No host sandbox. Only a Copilot Studio demo, no managed platform connectors.	Partial **Has:** Behavior analysis on gateway sessions. SIEM export to Splunk, Datadog, OTLP and syslog. **Lacks:** No cloud control-plane log detection. Blocks tool calls, not hosts.	Partial **Has:** Prompt Guard, system prompt lock and 100+ DLP detection types at the gateway. **Lacks:** No browser extension. No toxicity, hallucination or code output filtering found.	Partial **Has:** Audit trail, OWASP agentic mapping and EU AI Act evidence page for AI Gateway. **Lacks:** No AIBOM export. Framework mapping sits in blogs, not in product reports.	No evidence **Lacks:** No attack library, multi-turn simulation or CI/CD red team runs.	Partial **Has:** Agent Personas, Agent Access Keys, OAuth 2.1 identity proxy and token brokerage. **Lacks:** No cryptographic per-agent identity such as SPIFFE. No NHI discovery of service accounts.	No evidence **Lacks:** No model file scanner, dataset PII or poisoning scan, or AI SAST.
Radware #18 3 / 8 App, API and DDoS security vendor with LLM Firewall and Agentic AI Protection.	Partial **Has:** Agent and tool discovery, risk graph and agent risk scoring in Agentic AI Protection. **Lacks:** No Kubernetes or on-prem inventory. No cloud misconfiguration or CI/CD checks found.	Partial **Has:** MCP Server Protection, MCP Tool Control and seven named agent platform integrations. **Lacks:** No agent sandbox. Tool allow lists only, no process, file or egress isolation.	Partial **Has:** Intent-aware runtime detection and blocking of agent hijack, tool misuse and rogue agents. **Lacks:** No cloud control-plane logs, named SIEM or ITSM link, or host-level blocking.	Partial **Has:** LLM Firewall inline, out-of-path API and OpenAI-compatible inline modes, plus client-side agents. **Lacks:** PII blocking shown on prompts only. No hallucination or harmful-code output filter.	Partial **Has:** On-demand compliance reports for three frameworks, OWASP alignment, full agent audit trail. **Lacks:** No AIBOM export. Agent inventory only.	No evidence **Lacks:** No attack library, multi-turn simulation or scheduled red team runs.	Partial **Has:** Per-agent MCP tool allow and block, plus Web Bot Auth checks on external agents. **Lacks:** No per-agent cryptographic identity for own agents. No API key or token governance.	No evidence **Lacks:** No pickle or ONNX scanning, dataset PII scan or AI code scanning.
Unosecur #18 3 / 8 Identity security platform for humans, NHIs and AI agents, with ITDR and an MCP Gateway.	Partial **Has:** AI Agent Security inventories agents on Bedrock, Vertex, Copilot Studio, endpoints, repos. **Lacks:** No model or notebook posture checks. No CI/CD or supply-chain scanning.	Partial **Has:** MCP Gateway: server inventory, tool policy, just-in-time access, Freeze Agent. **Lacks:** No kernel or host sandbox. Egress control not shown. Gateway allowlist only.	Partial **Has:** ITDR with Freeze Agent, identity quarantine, ServiceNow and Jira integrations, Ark AI remediation. **Lacks:** Blocks tool calls and identities, not processes, files or network on hosts.	Partial **Has:** MCP Gateway guardrails on tool requests and responses. SDK and hooks for custom agents. **Lacks:** No browser extension or third-party gateway integration. No jailbreak, toxicity or hallucination filters.	Partial **Has:** Compliance view by framework with evidence. Audit trail. SOC2 PDF reports via Ark AI. **Lacks:** No AIBOM export in CycloneDX. Agent inventory lists models and tools only.	No evidence **Lacks:** No attack library, no multi-turn attacks, no CI/CD red teaming.	Partial **Has:** Unified Identity Fabric: NHI and agent inventory, MCP Gateway tool policy, just-in-time access. **Lacks:** No per-agent cryptographic identity such as SPIFFE. Agents act under user or service accounts.	No evidence **Lacks:** No model file scanning, dataset PII or poisoning scans, or AI SAST.
Midships #21 2.5 / 8 Identity consultancy whose Icebreaker product governs AI agent actions at runtime.	No evidence **Lacks:** No inventory, shadow AI discovery or posture checks found.	Partial **Has:** Icebreaker allow, approval or deny gate. Revoke an agent at once. **Lacks:** Pilot stage. No MCP security. No named agent platforms. No host sandbox.	Partial **Has:** Icebreaker pre-action deny and approval. Decision records to SIEM and GRC. **Lacks:** Pilot stage. No attack detection. Blocks actions, not hosts. No named SIEM.	Partial **Has:** Icebreaker action-level check before execution. **Lacks:** No prompt injection, PII or output filtering. Pilot stage.	Partial **Has:** Central decision record. Consulting readiness check against four regimes. **Lacks:** No AIBOM. No OWASP, NIST or ISO mapping. No report export found.	No evidence **Lacks:** No attack library. No agent attack simulation. No CI/CD red teaming.	Partial **Has:** Persona limits, approval thresholds, one-time execution token via identity platform. **Lacks:** Identity comes from Ping, not Midships. No NHI discovery. Pilot stage.	No evidence **Lacks:** No model scanner. No dataset scanner. No AI SAST.

How we scored. Each module has three parts. Supported means the vendor matches the AccuKnox benchmark on all three, shown on the vendor's own site or docs. Partial means it covers part of the module, or ships it in beta or preview. No evidence means two or more targeted searches and a look at the product pages found nothing public. Vendor list taken from the KuppingerCole AI security Leadership Compass chart. Scores reflect public documentation only, read October 2026.
