WEB CHANGE REQUEST

Global Bank SBOM Case Study

Move the page to a new URL, redirect the old one with a 301, and remove every India reference.

Change the URL and Redirect the Old One

Change the page slug from `sbom-india-bank` to `sbom-global-bank`. Then add one permanent redirect for each language copy.

Old URL path	New URL path	Code
`/case-studies/sbom-india-bank`	`/case-studies/sbom-global-bank`	301
`/ko/case-studies/sbom-india-bank`	`/ko/case-studies/sbom-global-bank`	301
`/ja/case-studies/sbom-india-bank`	`/ja/case-studies/sbom-global-bank`	301
`/fr/case-studies/sbom-india-bank`	`/fr/case-studies/sbom-global-bank`	301
`/es/case-studies/sbom-india-bank`	`/es/case-studies/sbom-global-bank`	301

Steps in WordPress

1. Edit the page. Change the slug to `sbom-global-bank`. Save.
2. Open Rank Math, then Redirections, then Add New. Enter the old path as the source with an exact match. Enter the full new URL as the destination. Choose 301 Permanent Move. Repeat for the four language paths.
3. Check that the canonical, `og:url` and hreflang links in the page head show the new slug.
4. Update the mega menu link, the case-studies index card and the sitemap entry.
5. Purge the Cloudflare and site cache.

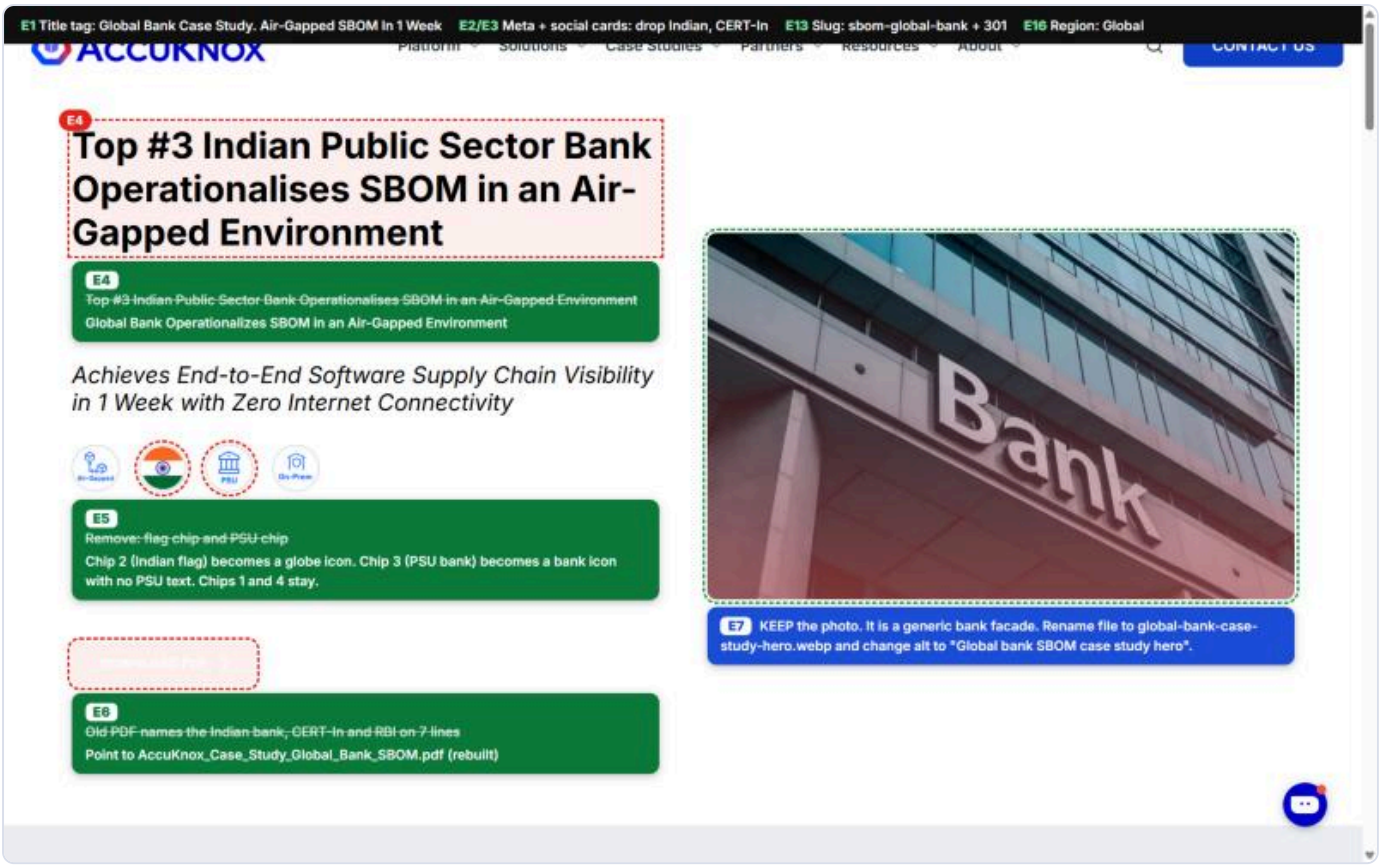

Test after the change

```
curl -sI https://accuknox.com/case-studies/sbom-india-bank | head -n 5
```

Expect `HTTP/2 301` and a `location` header that ends in `/case-studies/sbom-global-bank`. Run the same test for the four language paths.

> **Two items need sign-off before this goes live.**
>
> 1. The edited customer quote on page 4 needs approval from the customer.
> 2. The PDF needs a rebuild. The live file names the Indian bank on 7 lines. Do not link the new PDF until it is uploaded.
>
> The page does not name the customer. Keep it that way in the slug, the alt text, the file names and the PDF.

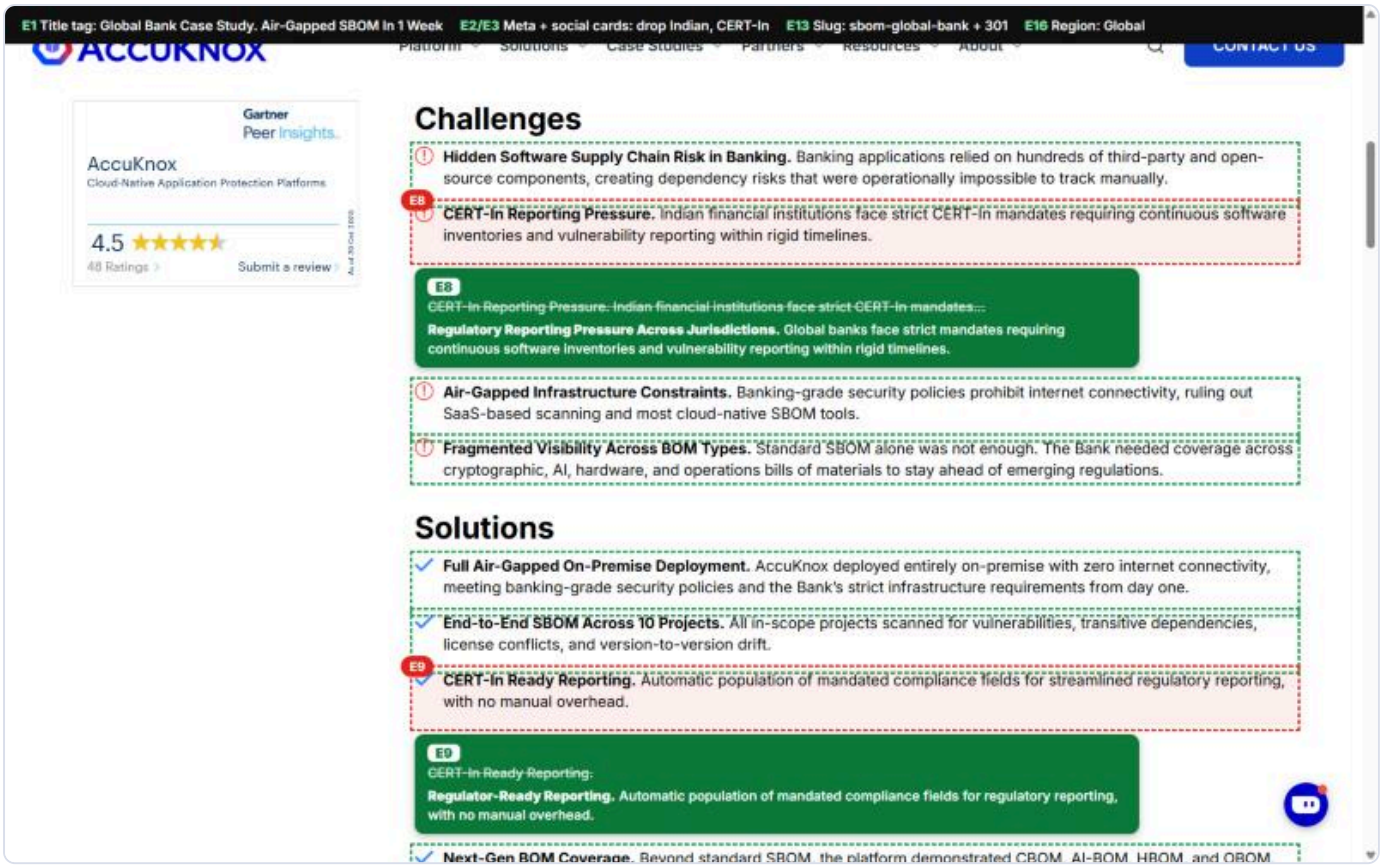

Hero Edits E4 to E7

Live page with edits marked. Red dashed boxes are removals, green boxes are the new text, blue is keep.

ID	Remove	Use
E4	Top #3 Indian Public Sector Bank Operationalises SBOM in an Air-Gapped Environment	Global Bank Operationalizes SBOM in an Air-Gapped Environment
E5	Chip 2: Indian flag. Chip 3: PSU bank icon.	Chip 2: globe icon. Chip 3: bank icon with no PSU text. Chips 1 and 4 stay.
E6	SBOM-Case-Study.pdf	AccuKnox_Case_Study_Global_Bank_SBOM.pdf
E7	Alt: Top Indian public sector bank SBOM case study hero	Keep the photo. Alt: Global bank SBOM case study hero. Rename the file to global-bank-case-study-hero.webp.

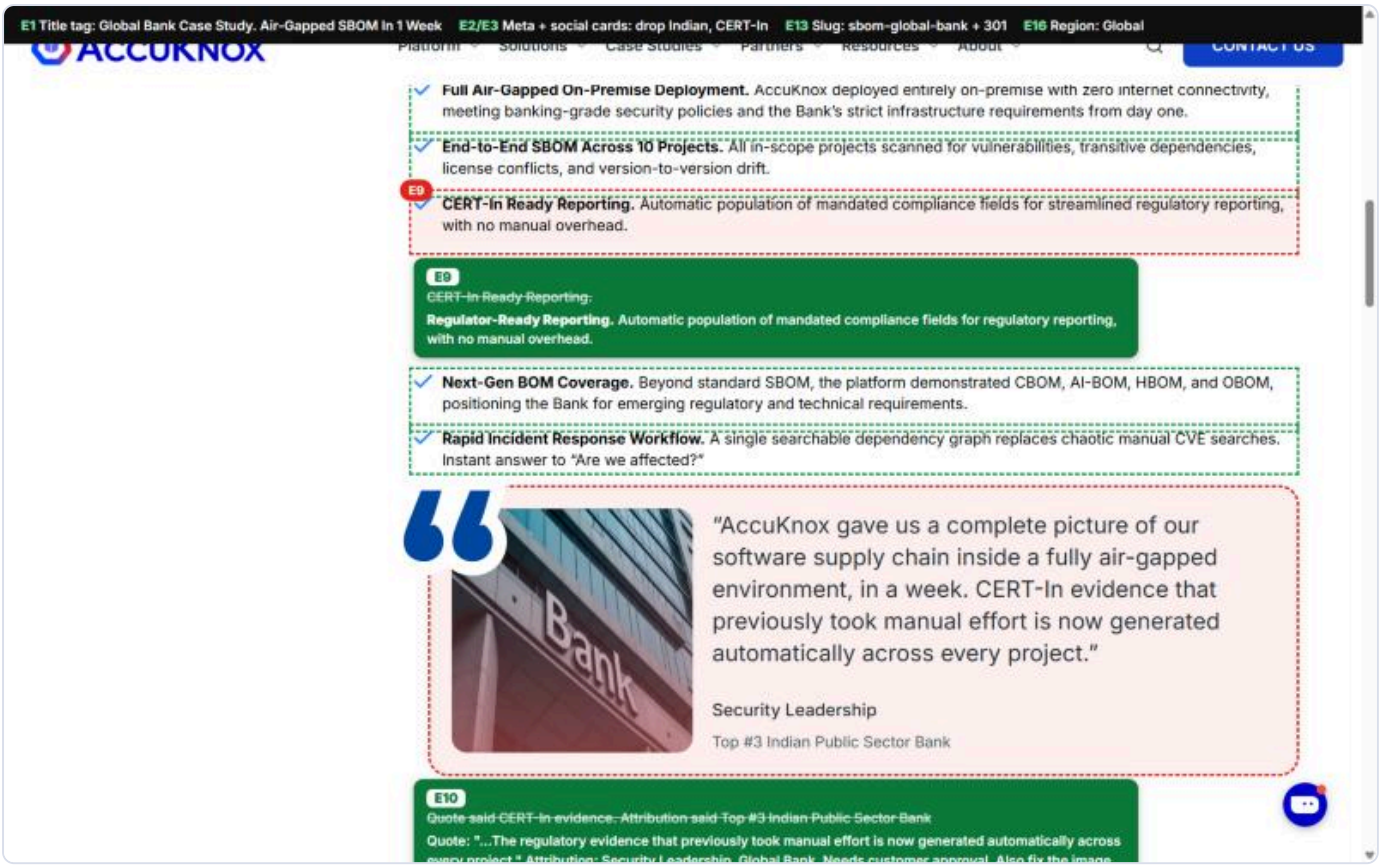

Body Edits E8 and E9

Challenge 2 and Solution 3 name CERT-In. The other bullets stay.

ID	Remove	Use
E8	**CERT-In Reporting Pressure.** Indian financial institutions face strict CERT-In mandates requiring continuous software inventories and vulnerability reporting within rigid timelines.	**Regulatory Reporting Pressure Across Jurisdictions.** Global banks face strict mandates requiring continuous software inventories and vulnerability reporting within rigid timelines.
E9	**CERT-In Ready Reporting.** Automatic population of mandated compliance fields for streamlined regulatory reporting, with no manual overhead.	**Regulator-Ready Reporting.** Automatic population of mandated compliance fields for regulatory reporting, with no manual overhead.

Quote Edit E10 Needs Customer Approval

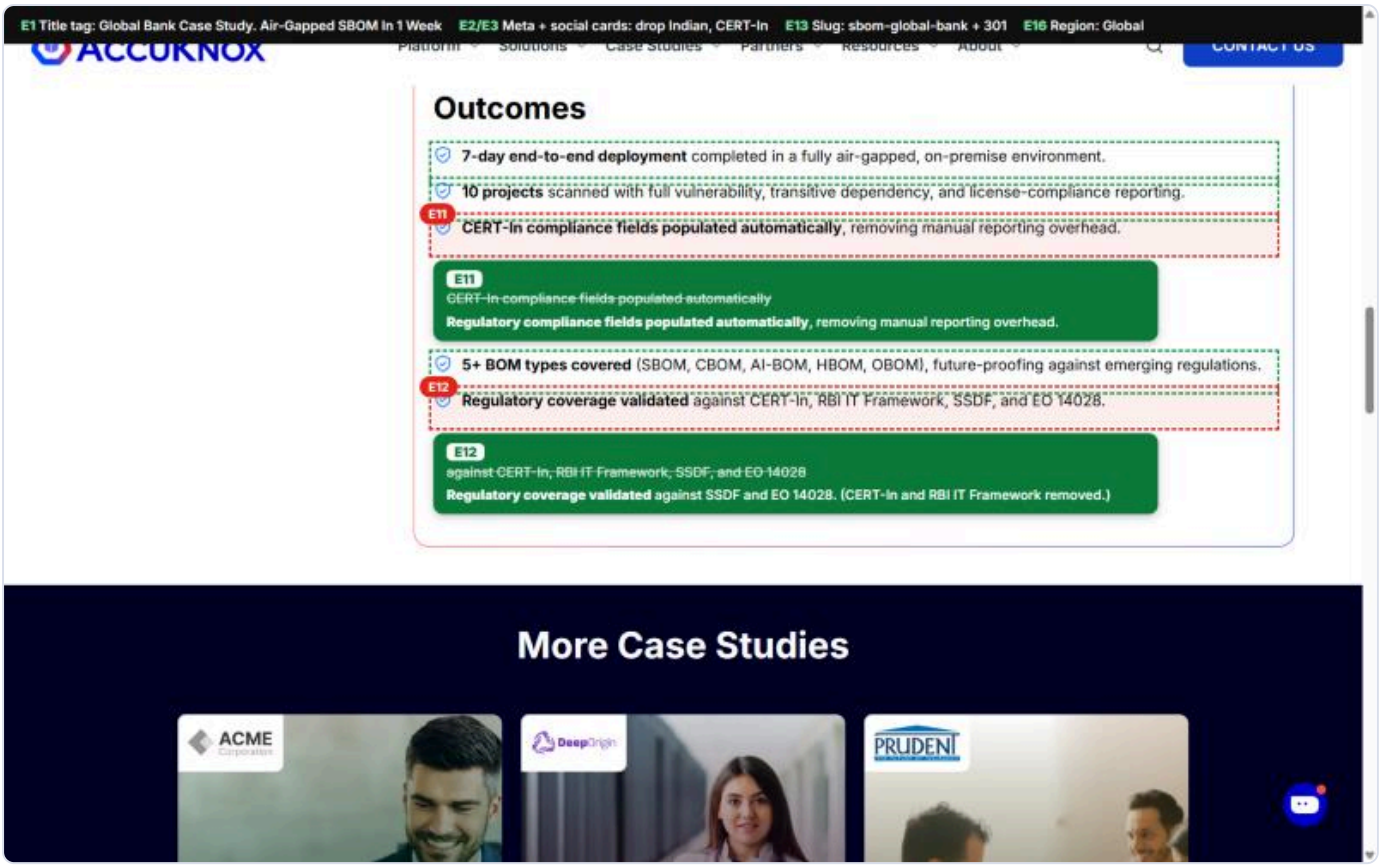

The quote and its attribution both name India.

ID	Remove	Use
E10	"...CERT-In evidence that previously took manual effort is now generated automatically across every project." Security Leadership, Top #3 Indian Public Sector Bank. Image alt: yoma-fleet.	"[CONFIRM CUSTOMER APPROVAL] ...The regulatory evidence that previously took manual effort is now generated automatically across every project." Security Leadership, Global Bank. Image alt: Global bank building.

The old alt text read `yoma-fleet`, a copy error from another case study. It is fixed in the new text. Remove the bracket only after the customer approves the quote.

Outcome Edits E11 and E12

Outcomes 3 and 5 name CERT-In and the RBI IT Framework.

ID	Remove	Use
E11	**CERT-In compliance fields populated automatically**, removing manual reporting overhead.	**Regulatory compliance fields populated automatically**, removing manual reporting overhead.
E12	**Regulatory coverage validated** against CERT-In, RBI IT Framework, SSDF, and EO 14028.	**Regulatory coverage validated** against SSDF and EO 14028. [CONFIRM: add any framework the customer validated, then delete this bracket]

Outcomes 1, 2 and 4 keep their figures: 7-day deployment, 10 projects and 5+ BOM types. The customer confirmed on 2026-10-29 that these figures are the global bank's.

Head Tags and Links E1 to E3 and E13 to E16

ID	Remove	Use
E1	Title: Top Indian Public Sector Bank Case Study. Air-Gapped SBOM In 1 Week	Title: Global Bank Case Study. Air-Gapped SBOM In 1 Week
E2	Description: Top #3 Indian public sector bank deploys AccuKnox SBOM on-premise in an air-gapped environment in 7 days. 10 projects scanned, 5+ BOM types covered, CERT-In ready evidence.	Description: Global bank deploys AccuKnox SBOM on-premise in an air-gapped environment in 7 days. 10 projects scanned, 5+ BOM types covered, regulator-ready evidence.
E3	og and twitter title, description and alt text repeat the old wording. og:image is indian-bank-case-study-hero.webp.	Same new title and description. og:image is global-bank-case-study-hero.webp. og:image:alt: Global bank SBOM case study hero.
E13	Slug sbom-india-bank	Slug sbom-global-bank, with the 301 redirects on page 1
E14	Mega menu and hreflang links use sbom-india-bank. Menu icon sbom-india-nav-image.webp.	New slug in both. Menu icon sbom-global-nav-image.webp (same artwork, new name).
E15	ConveyThis keeps Korean, Japanese, French and Spanish strings that say Indian and CERT-In.	Clear the cached strings for this page and translate it again.
E16	Select Region: India	Select Region: Global. Add a Global option if the list has none. Confirm the card is not under the Public Sector filter.

The new title is 49 characters and the new description is under 160 characters.

Rebuild the PDF and Replace the Image Files

Name the new PDF `AccuKnox_Case_Study_Global_Bank_SBOM.pdf`. Set the title metadata to the same name without the extension. Delete the old PDF from the media library after the new one is live.

PDF section	Remove	Use
Cover	SBOM POC : Top #3 Indian Public Sector Bank. Strap: ...CERT-In Compliance	Label CASE STUDY, H1 Global Bank. Strap: Air-Gapped Deployment · 1-Week Execution · Regulator-Ready Evidence
Challenge	Indian financial institutions face strict CERT-In mandates	Same wording as E8
Key finding tile	CERT-In Ready Fields	Regulator-Ready Fields
Business value	Automatically satisfies CERT-In software inventory and vulnerability reporting obligations	Automatically satisfies mandated software inventory and vulnerability reporting obligations
BOM readiness	CERT-In compliance walkthroughs	Regulatory compliance walkthroughs
Regulatory coverage	RBI IT Framework (and any CERT-In badge)	SSDF and EO 14028 only

Check every logo and screenshot inside the PDF by eye for a flag or a bank name.

New image files

Asset	Remove	Use
Globe chip	indian-india-bank.webp	global-global-bank.webp. 101x101, circle, line-art globe in the chip blue. New artwork.
Bank chip	PSU-india-bank.webp	banking-global-bank.webp. 101x101, circle, bank pillars with no PSU text.
Renames only	air-gapped-india-bank.webp, on-premises-india-bank.webp, indian-bank-case-study-hero.webp, sbom-india-nav-image.webp	air-gapped-global-bank.webp, on-premises-global-bank.webp, global-bank-case-study-hero.webp, sbom-global-nav-image.webp

Checks before closing

1. Search the page source for india, indian, cert-in, rbi, psu and public sector. Only site-wide footer items may remain.
2. Test the five redirects with curl.
3. Open the Korean, Japanese, French and Spanish pages. None may show Indian or CERT-In.
4. Refresh the LinkedIn and X card caches with the new URL.
5. Resubmit the new URL in Google Search Console.
6. Update every other internal link to `sbom-india-bank`.
