FOUR VENDORS · ONE SCORECARD

AppSec Comparison Scorecard

AccuKnox, Snyk, Veracode and Checkmarx across ASPM, SAST, DAST, SCA and SBOM, containers, API security, runtime, compliance, deployment and integrations.

AccuKnox documents 50 of 51 capabilities in full. Snyk 27, Veracode 26, Checkmarx 33.

SUMMARY

Capability coverage at a glance

Full, partial and missing capabilities out of 51, by vendor.

● Yes Confirmed capability ● Partial Available in a limited form ● No Not found in public documentation

Where the gap is widest

01 Inline runtime enforcement
Kernel-level blocking through KubeArmor, a CNCF sandbox project, with eBPF and LSM. Runtime telemetry ties back to build-time findings.

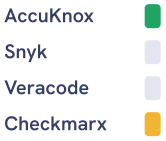

02 Air-gapped on your terms
Full on-prem and air-gapped deployment, isolated registry scanning and customer-run vulnerability database updates.

03 API security from live traffic
Shadow, Zombie and Orphan API discovery, sensitive-data detection in payloads, gateway integrations and rate limiting.

04 xBOM beyond software
SBOM, HBOM, CBOM for PQC readiness, QBOM and AI-BOM across 12 BOM use cases, including SLSA provenance.

Where AccuKnox is partial

- **Custom SAST rule authoring.** Quality gates and severity tuning ship today. Self-service custom rules are on the roadmap. Snyk and Veracode have no self-service equivalent. Checkmarx does, through CxQL.
- **Capabilities only AccuKnox rates Yes.** Runtime enforcement, air-gapped and hybrid deployment, live-traffic API controls and the full xBOM suite.

How we scored

- **Yes** means the vendor documents the capability. **Partial** means it exists in a limited form. **No** means we found no native capability in public documentation.
- AccuKnox ratings come from help.accuknox.com. Competitor ratings come from the vendors' own documentation and product pages, listed below. Reviewed October 2026.
- Vendors ship changes often. If a rating no longer matches your version of a product, tell us and we will update it.
- Checkmarx ratings come from the same review of public documentation.
