They secure AI from their cloud. AccuKnox secures it **anywhere.**

Pick AccuKnox to

Run the full stack on-prem or air-gapped

Enforce inside the gateways you already run

Contain agents at the kernel with eBPF

Build sandboxed security agents with AgentZ

● 9 of 22 capabilities only AccuKnox fully supports ● 7 rival cells not supported ● 33 rival cells limited ● 3 parity

Module	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
AI for Security (AgentZ)	✓ SUPPORTED Agents, AI SAST, DAST	⦿ LIMITED SOC agents, no DAST	⦿ LIMITED SOC agents, services	⦿ LIMITED SOC assistant only
01 AI-SPM	✓ SUPPORTED Cloud, on-prem, 4 surfaces	⦿ LIMITED SaaS console, extra license	⦿ LIMITED SaaS console only	⦿ LIMITED SaaS console only
02 Agentic AI Security	✓ SUPPORTED Kernel sandbox per agent	⦿ LIMITED Coding-agent hooks	⦿ LIMITED Endpoint agent types	⦿ LIMITED Hooks, no host control
03 AI Detect and Respond	✓ SUPPORTED Cloud AI logs, auto-remediate	✓ SUPPORTED Audit-log analytics	⦿ LIMITED Bedrock logs, AWS only	⦿ LIMITED Gateway telemetry only
04 Guardrails and Prompt Firewall	✓ SUPPORTED Browser, CLI, SDK, 6 gateways	⦿ LIMITED Needs SASE, skips replies	⦿ LIMITED Replies report only	⦿ LIMITED 200k prompt cap
05 Red Teaming and Pen Testing	✓ SUPPORTED On-prem models, scheduled	= PARITY 500+ attacks	⦿ LIMITED Service engagement	= PARITY LLMs, agents, MCP
06 AI Identity Security	✓ SUPPORTED Agents hold no secret	⦿ LIMITED Separate CyberArk platform	⦿ LIMITED Agentic IdP unreleased	✓ SUPPORTED Agent intent control
07 AI Model and Dataset Security	✓ SUPPORTED Scan, CI gate, sandbox	✓ SUPPORTED Public Hugging Face only	⦿ LIMITED Formats not shown	⦿ LIMITED Formats not shown
08 AI Compliance and Governance	✓ SUPPORTED CycloneDX AIBOM, 4 frameworks	⦿ LIMITED No AIBOM export shown	✗ NO EQUIVALENT Maps its own AI only	⦿ LIMITED Ingests AIBOM, no export

Ranked #1 at BSides

Ranked #1 by GigaOm

#1 in Andrew Green's AI firewall report

Co-developed with SRI International

AgentZ builds sandboxed security agents, and AccuKnox tests the app too

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
 AgentZ agentic harness Security agents for any job, on-prem too	✓ SUPPORTED - One sentence builds a security agent Default-deny kernel sandbox, no secrets - Open source, runs on-prem, air-gapped - Replayable trace of every action	✓ SUPPORTED - Custom AgentiX agents - SaaS tenant, compute-unit quota	✓ SUPPORTED - No-code AgentWorks agents - Falcon cloud only, AI credits	⚠ LIMITED - Athena AI SOC assistant - No customer agent builder
 AI SAST Faster triage of code findings	✓ SUPPORTED - AI flags false positives - AI rates severity per finding - IDE-based AI SAST COMING SOON	⚠ LIMITED - No native SAST scanner - Ingests Semgrep, Snyk, SARIF	⚠ LIMITED - AI code scan as expert service - No self-serve SAST shown	✗ NO EQUIVALENT - Repo secrets and CVE scans - No SAST engine shown
 DAST and AI DAST Tests the live app, past the login	✓ SUPPORTED 4 scan types, baseline to active - Scans behind MFA and TOTP logins - AI DAST agent COMING SOON	✗ NOT SUPPORTED No DAST in Cortex docs	✗ NO EQUIVALENT - External attack surface only - No authenticated app scan	✗ NOT SUPPORTED No web app DAST
 AI-powered pentesting Continuous tests replace manual pentests	✓ SUPPORTED - Automated attacks on app and model - On demand or on a cron schedule	⚠ LIMITED - Red teams AI endpoints - No web app pentest shown	⚠ LIMITED Human-led service engagements	⚠ LIMITED LLM endpoint pen tests only

AccuKnox inventories AI in the cloud, the data center and the laptop

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
 Cloud AI posture One agentless inventory, one license	✓ SUPPORTED - Agentless, read-only on AWS, Azure, GCP - Models, datasets and computes - Pipeline graph traces exposure paths	✓ SUPPORTED - AWS, Azure, GCP AI services - Needs separate Cortex C1 license	✓ SUPPORTED - Agentless on AWS, Azure, GCP - Bedrock, SageMaker, Vertex AI	✓ SUPPORTED - Bedrock, AgentCore, Foundry, Gemini - SageMaker not shown
 On-prem and self-hosted AI Your AI and its console stay in your data center	✓ SUPPORTED Control plane runs on-prem, air-gapped - vLLM, Triton, Ollama, NVIDIA NIM - Full SaaS parity, live in 30 min to 4 h	ⓘ LIMITED - Firewall runs on ESXi, KVM - Console stays SaaS	ⓘ LIMITED - Finds LLM runtimes on endpoints - SaaS console, no on-prem option	ⓘ LIMITED - Gateway data plane on-prem - SaaS-only console

Shadow AI: identify ≠ protect

ACCUKNOX

✓ SUPPORTED

Browser

Blocks uploads, masks PII, stops secrets

Desktop (Beta)

Agents, tools and skills in Claude Code

Hosts and clusters

AI on VMs and Kubernetes, 7 categories. Linux, macOS Beta

CLI agents

Codex, Kiro, Claude Code through the Prompt Firewall

Palo Alto Networks

ⓘ LIMITED

- ~2,300 GenAI apps visible
- ~380 with inline DLP
- Needs NGFW, Prisma Access or Prisma Browser

CrowdStrike

ⓘ LIMITED

- Endpoint AI discovery GA
- Desktop AI apps: Windows, report only
- Browser replies never blocked

Varonis

ⓘ LIMITED

- Finds shadow AI in DNS and proxy logs
- Inline control needs vendor hooks
- No browser prompt control

AccuKnox enforces on every surface it discovers, with no proxy and no new browser.

Rivals gate agent traffic. AccuKnox also contains the agent on the host.

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
Managed agents Every managed agent in one view	✓ SUPPORTED - Agent-first view with IAM role, memory, tools Bedrock AgentCore Bedrock Agent Copilot Studio M365 Agents AI Foundry Power Apps - Prompt Firewall enforces on each	✓ SUPPORTED 10 SaaS agent platforms - AgentCore not listed	⚠ LIMITED - Copilot Studio: tool inputs only - Tool outputs not scanned	✓ SUPPORTED - Agentforce, Copilot Studio, Foundry - Centered on data permissions
MCP security MCP contained on the host, beyond the proxy	✓ SUPPORTED - Finds MCP servers on hosts and clusters - Kernel sandbox around MCP servers - AgentZ authorizes each MCP server once	✓ SUPPORTED - MCP gateway and registry - Agent must call the scan tool	✓ SUPPORTED - Local MCP proxy per client - Needs Node.js, stdio servers	✓ SUPPORTED - MCP discovery and blocking - Needs gateway or hook in path
Agent runtime sandbox Stops a rogue agent on the host	✓ SUPPORTED eBPF + LSM: process, file, network - LangGraph, n8n, MCP, no code change - Blocks reads of <code>/root/.aws/credentials</code>	⚠ LIMITED - Coding-agent hooks, Cortex AES - Separate subscription	⚠ LIMITED - Allow or block agent types - Managed endpoints, not servers	✗ NO EQUIVALENT - Tool-call gating via hooks - No host-level control shown

AccuKnox catches risky AI changes and red teams your on-prem models

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
 AI control-plane detection Detect and remediate risky AI changes	✓ SUPPORTED - Reads CloudTrail and Azure Event Hub - SageMaker, Bedrock, Azure ML, Azure OpenAI - Opens tickets, auto-remediates	✓ SUPPORTED - Bedrock, SageMaker audit-log alerts 14-day activation, 30-day training	⦿ LIMITED - Bedrock invocation logs, AWS only - Monitors, no blocking	⦿ LIMITED - Gateway and hook telemetry - CloudTrail AI detection not shown
 Runtime blocking Blocks at the prompt and at the kernel	✓ SUPPORTED - Block, sanitize or monitor inline - KubeArmor blocks the process at runtime - Same controls in SaaS and on-prem	✓ SUPPORTED - Allow or block per detection 2 MB sync payload cap	✓ SUPPORTED - SDK and gateway block both ways - Other collectors report only	✓ SUPPORTED - Block, modify, alert or log - Needs gateway, SDK or hook
 AI red teaming Red teams your on-prem models on a schedule	= PARITY 4 attack categories, OWASP LLM, MITRE ATLAS - TAP multi-turn, encoding, latent injection - Reaches Ollama and custom endpoints, on cron	= PARITY 500+ attacks, 50+ techniques - Separate license on NGFW credits	⦿ LIMITED - Human-led service only - No automated product shown	= PARITY - Tests agents, models, MCP - Attack library size unpublished

One Prompt Firewall enforces inside six gateways you already run

One Prompt Firewall, four ways in

SaaS chat in a browser

ChatGPT, Claude, Gemini, Copilot

Browser plugin

Chrome, Edge, Firefox, Safari, Brave

Developer CLI agents

Claude Code, Codex, Kiro

Gateway proxy

Proxy setting on the tool

Local AI agent

LangGraph, n8n, your own service

SDK or AI gateway

Python SDK, LiteLLM or Bifrost

Cloud AI agent

Bedrock AgentCore, Copilot Studio

API gateway

Azure APIM, AWS API Gateway, Apigee

ENFORCES INSIDE

LiteLLM

Bifrost

Kong AI

Azure APIM

AWS API Gateway

Apigee

AccuKnox AI Gateway **COMING SOON**

Runs where your AI runs

SaaS, on-prem or air-gapped, with the same policies

No new appliance

Plugs into the gateway your team already operates

Stateful per session

Scores the whole exchange, not the last prompt

One audit trail

Every prompt and response logged for review

Palo Alto Networks

⌵ LIMITED

- Own gateway, from the Portkey acquisition
- Listed for the Americas region
- Metered per token on NGFW credits

CrowdStrike

⌵ LIMITED

- Own AI gateway is pre-beta
- 7 gateway collectors
- No AWS API Gateway or Bifrost

Varonis

⌵ LIMITED

- Own Atlas AI gateway
- **200k prompts** per month per AI system
- Billed per AI system

AccuKnox enforces inside the gateway you already run, in any cloud or air gap.

AccuKnox blocks prompts and replies with no proxy and no new browser

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
 Browser prompt protection Full prompt control, no proxy	✓ SUPPORTED 5 browsers, pushed by Intune - Prompts, files, pastes and replies - Purview labels, blocks personal accounts - Allow, warn, redact, block	⦿ LIMITED - Needs SASE or Prisma Browser - Replies not scanned or logged	⦿ LIMITED - Managed Windows or macOS only - Replies report only	✗ NO EQUIVALENT - Browser tool blocks phishing only - ChatGPT logs read after the fact
>_ CLI coding agents Coding agents cannot leak secrets	✓ SUPPORTED - Codex, Kiro, Claude Code via gateway proxy - Blocks injection and jailbreaks - Stops secret and code leaks	⦿ LIMITED - Cortex AES hooks - Separate subscription	⦿ LIMITED - Claude Code collector - Desktop CLIs report only, Windows	✓ SUPPORTED - Hooks for Claude Code, Cursor, Codex - Vendor hook per tool
 Guardrail depth Catches jailbreaks split across turns	✓ SUPPORTED 14 policy classes: PII, secrets, code, toxicity Stateful: scores the whole session - Block, sanitize or monitor	✓ SUPPORTED - Nine detection services - Session scoring not shown	✓ SUPPORTED 11 detectors, 200+ injection types - Multi-turn scoring not shown	= PARITY - Full-session multi-turn scoring - Category count unpublished

Agents hold no secret, and unsafe models never load

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
 Agent identity and least privilege Agents never hold a credential	✓ SUPPORTED - Credentials scoped, injected at run time - Mutate, push, delete denied by default - Role-based control per action. Module COMING SOON	⓪ LIMITED - Via CyberArk, a separate platform - Per-tool-call scope not shown	⓪ LIMITED - Agentic IdP announced, unreleased - SGNL for continuous identity	✓ SUPPORTED - Agent IBAC blocks intent drift - Full governance needs Varonis DSP
 Model file security Unsafe models never load	✓ SUPPORTED - Pickle, HDF5, SavedModel, ONNX, checkpoints - Hugging Face and GitHub, gated in the PR - Kernel sandbox contains what gets through	✓ SUPPORTED 50+ model formats - Private Hugging Face repos unsupported	⓪ LIMITED - Trojan and backdoor scan - Formats and Hugging Face not shown	⓪ LIMITED - Model artifact scan named - No formats listed
 Dataset security Training data checked before and during use	✓ SUPPORTED - Dataset exposure, PII and PHI scans - Model card PII, membership inference risk - AI-DR flags unapproved training datasets	✓ SUPPORTED - PII classification on datasets - Needs Cortex AI-SPM license	⓪ LIMITED - AI data-flow view in early beta - Poisoning detection not shown	✓ SUPPORTED - Classifies training data stores - Alerts on training data changes

AccuKnox exports the AIBOM and runs where your auditors need it

CAPABILITY	ACCUKNOX	Palo Alto Networks	CrowdStrike	Varonis
AI Bill of Materials Models ship in the same BOM as code	✓ SUPPORTED - CycloneDX AIBOM beside SBOM and CBOM - knoxctl, image scan or GitHub Actions - Supports EO 14028 and the EU AI Act	ⓘ LIMITED - AI-BOM named in mapping - No CycloneDX export shown	ⓘ LIMITED - AI model inventory - No AIBOM export shown	ⓘ LIMITED - Ingests vendor AIBOMs - No AIBOM export shown
Framework mapping and evidence Audit evidence from runtime, not surveys	✓ SUPPORTED - MITRE ATLAS, OWASP LLM, NIST AI RMF, AVID - Every prompt and response audit-logged - Same mapping on-prem. AI-GRC module COMING SOON	✓ SUPPORTED - OWASP, EU AI Act, NIST, MITRE - ISO 42001 not shown	✗ NO EQUIVALENT - ISO 42001 covers its own Charlotte AI - No customer AI mapping shown	✓ SUPPORTED - EU AI Act, NIST, ISO 42001 - OWASP LLM, MITRE ATLAS not shown

Where the control plane runs

SaaS, on-prem or air-gapped
Helm on Kubernetes or a 3-node VM cluster

Palo Alto Networks

SaaS
Strata Cloud Manager and Cortex tenants

CrowdStrike

SaaS
US-1, US-2 and EU-1 clouds, no on-prem equipment

Varonis

SaaS
Self-hosted Varonis ends 31 Dec 2026
