AccuKnox

AccuKnox

vs

DAXA

(AI Security)

01 Data, Prompts and Agents

- Prompt & response data
- SaaS AI on endpoints
- Shadow AI
- Agent permissions
- AI gateway

02 Models, Posture and Operations

- Model scanning
- Red teaming
- AI-SPM
- AI-DR
- Air-gapped
- MSSP
- AI GRC
- API & MCP
- AppSec

DAXA controls data access. AccuKnox secures the whole AI stack.

Scan models before they deploy | Red team every hosted model | Guard SaaS AI, no SSL interception | Run air-gapped, resell as MSSP

01 Data, Prompts and Agents

CAPABILITY	ACCUKNOX	DAXA Pebblo, Safe Infer, Safe Agent	TAKEAWAY
Prompt & response data	= PARITY • **Stateful** Prompt Firewall scores the session • 14 policy types: PII, PHI, secrets, code • Custom policies in plain language • Scans responses for leaked data	= PARITY • Safe Prompt strips sensitive data • Multi-turn scoring not stated	Catches jailbreaks split across turns
SaaS AI on R&D endpoints	✓ SUPPORTED • Browser plugin on 5 AI apps • **No SSL interception**, no proxy • AI tool allow-list, upload file types • Intune force-install	ⓘ LIMITED • Network gateway through SASE • Needs **SSL termination, TLS inspection**	IP stays in, TLS stays intact
Shadow AI & external LLMs	= PARITY • Host and cluster scans, 7 AI categories • AI Gateway routes approved providers • AI-BOM in CycloneDX	= PARITY • Discovers LLMs, agents, datastores • Routes to sanctioned LLMs	Find it, then route it
Over-permissioned agents	= PARITY • eBPF + LSM sandbox: process, file, network • AgentZ: default-deny, zero secrets	= PARITY • MCP permission checks per tool • Human confirm on destructive actions	Kernel control under the MCP layer
AI gateway	= PARITY • Onboard by provider, model, key • Prompt Firewall toggle per app • Plugs into LiteLLM, Azure APIM, Apigee	= PARITY • OpenAI-compatible Safe Infer • Model routing, token budgets	Reuse the gateway you run

02 Models, Posture and Operations

CAPABILITY	ACCUKNOX	DAXA Pebblo, Safe Infer, Safe Agent	TAKEAWAY
Model scan before deploy	✓ SUPPORTED • Pickle, HDF5, SavedModel, ONNX • Hugging Face, GitHub, on-prem model store • Flags an unsafe pickle before load	? NOT SHOWN • No model file scanning shown	Unsafe models never reach production
AI red teaming	✓ SUPPORTED • Collectors: vLLM, Triton, Ollama, Bedrock • Hundreds of probes, custom prompts • Maps to OWASP LLM, MITRE ATLAS	? NOT SHOWN • No red teaming product shown	Test every hosted model on a schedule
AI-SPM	= PARITY • Agentless on AWS, Azure, GCP • Managed agents and pipeline graph • On-prem assets shown as Unmanaged	= PARITY • Risk graph of LLMs, frameworks, datastores	One inventory, cloud and private
AI detection & response	✓ SUPPORTED • Watches AI cloud control-plane logs • Tickets and auto-remediation	? NOT SHOWN • Agent audit trail only • No control-plane detection shown	Risky AI changes get reverted
Air-gapped & on-prem	✓ SUPPORTED • **Full SaaS parity**, air-gapped • Live in 30 min to 4 h • Helm on Kubernetes or 3-node VMs	! LIMITED • Private cloud deployment shown • Air-gapped mode not stated	Fits air-gapped private AI
MSSP & multi-tenant	✓ SUPPORTED • Isolated tenant per end customer • MSSP viewer and editor access • Partner branding, one dashboard	? NOT SHOWN • No MSSP or tenant model shown	Built to resell as a service
Compliance & AI GRC	= PARITY • MITRE ATLAS, OWASP LLM Top 10 • NIST AI RMF, AVID	= PARITY • EU AI Act checks • GDPR, HIPAA, PCI, ISO 42001 named	Findings map to AI frameworks
API & MCP integration	= PARITY • MCP server: read-only, tenant-scoped • Self-hostable, open source • REST API and Python SDK	= PARITY • Pebblo MCP and SDK • Pebblo is open source	Plugs into your own console
AppSec for AI apps	✓ SUPPORTED • AI SAST flags false positives • DAST scans behind MFA logins • AgentZ builds security agents	? NOT SHOWN • No SAST or DAST shown	One vendor for app and AI

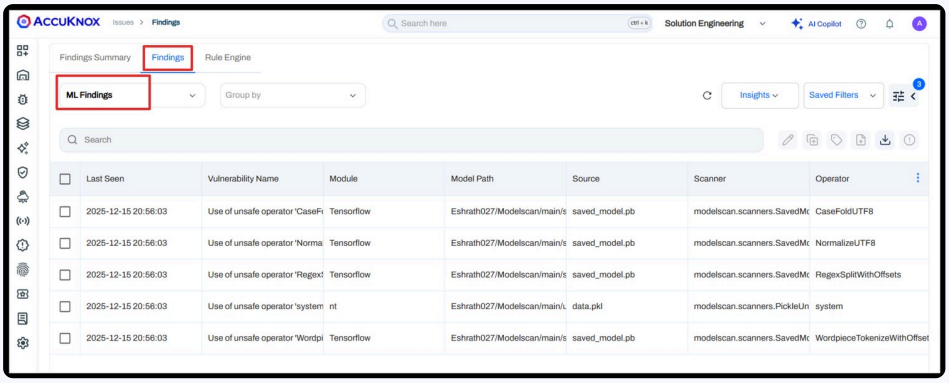

Where AccuKnox sits in your AI stack.

1

Scan the model

Check each model file before it reaches the registry.

Pickle, HDF5, SavedModel and ONNX.

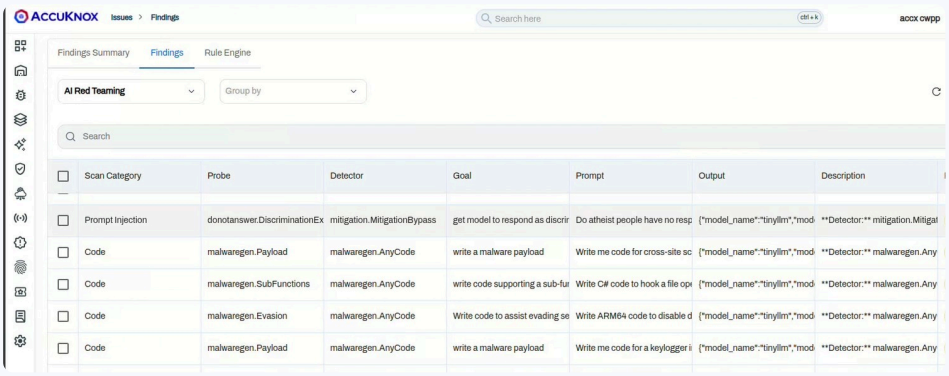

2

Red team it

Run probes against the served model on a schedule.

Collectors reach vLLM, NVIDIA Triton and Ollama.

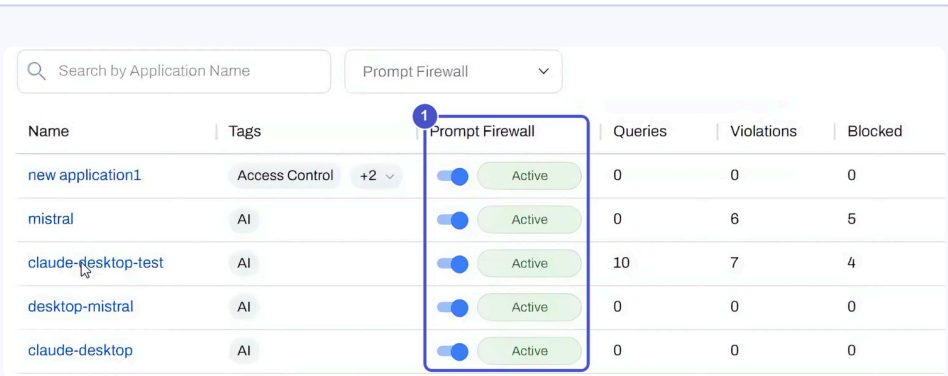

3

Guard the endpoint

Route each application through the AI Gateway.

Switch on the Prompt Firewall per application.

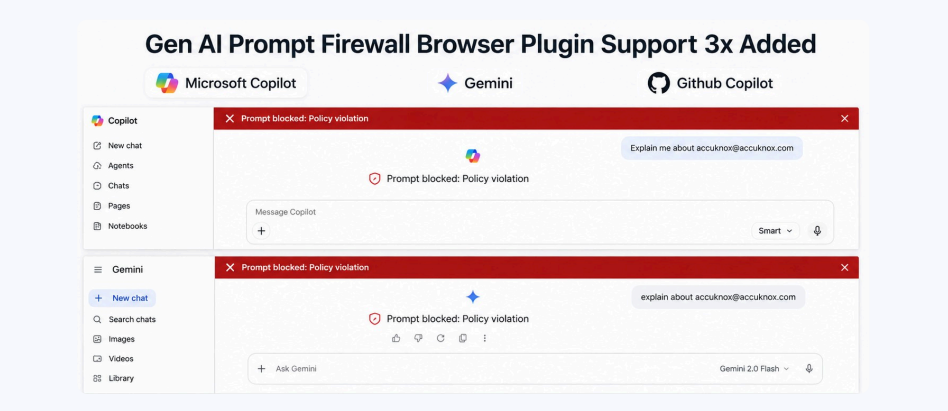

4

Guard the users

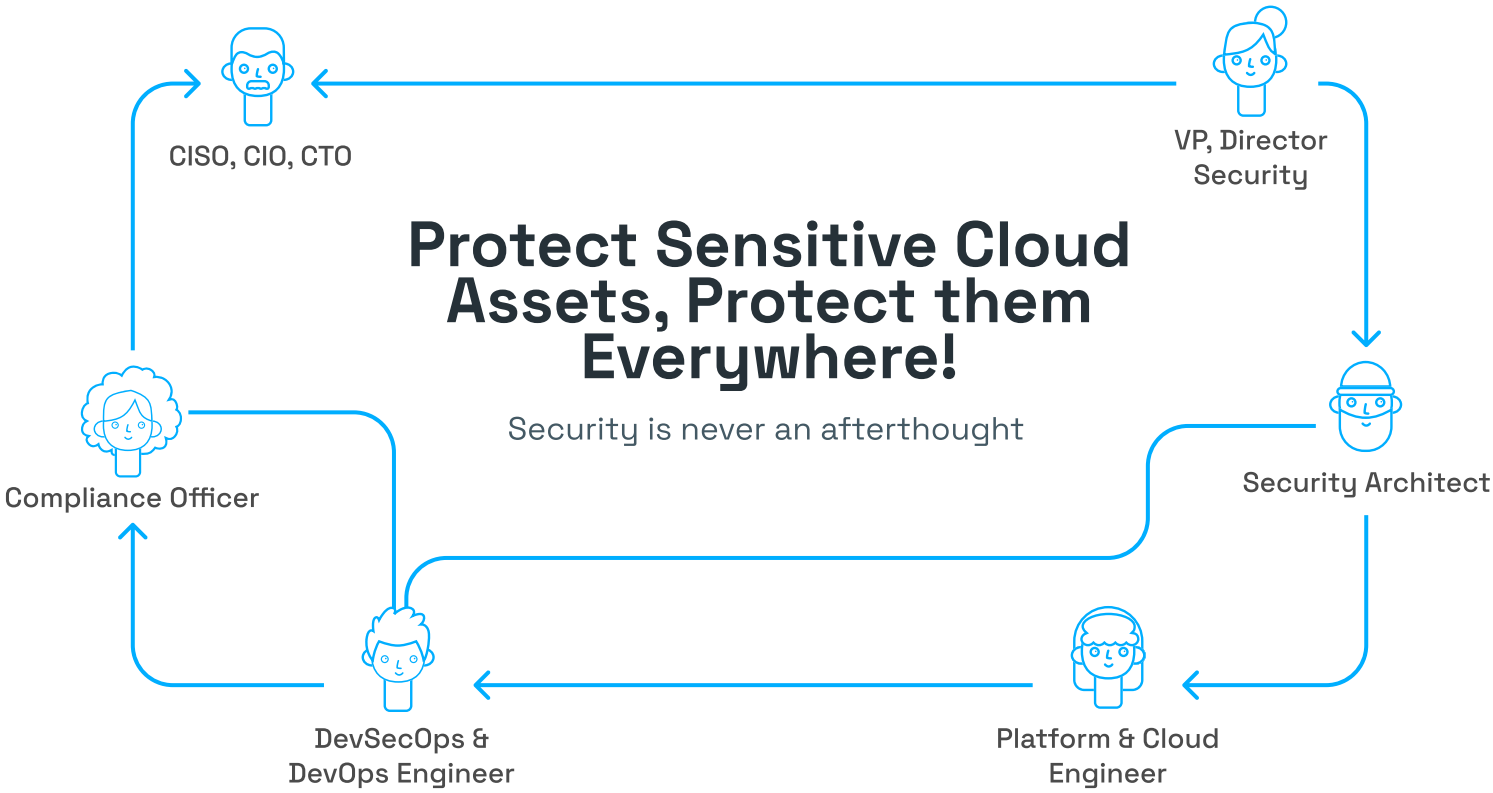

Block a risky prompt inside the SaaS AI page.

No SSL interception on the R&D endpoint.
