AccuKnox Prompt Firewall sits in 5 places

Browser plugin
Extension + 1 token, 5 steps
Policy on employee AI, no proxy

Python SDK
pip install + 2 calls
Prompt and reply linked by session

AI gateway
LiteLLM callback or AccuKnox AI Gateway
No code change per app

Cloud API gateway
Azure APIM, AWS API Gateway, Apigee
Clients swap endpoint and key

Low-code flow
2 REST calls around the LLM
Central policy, app logic untouched

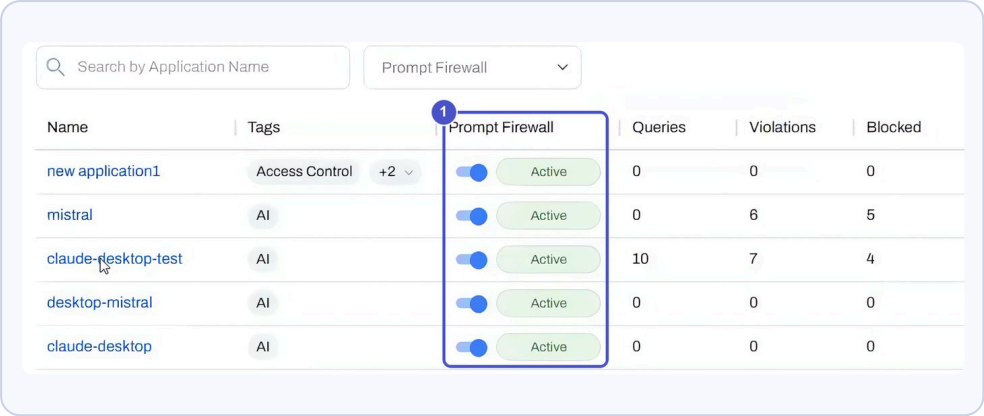

From first install to audit trail in 4 steps.

1

Connect

Onboard an app in the AI Gateway and switch on the Prompt Firewall.

Or push the browser plugin with Intune.

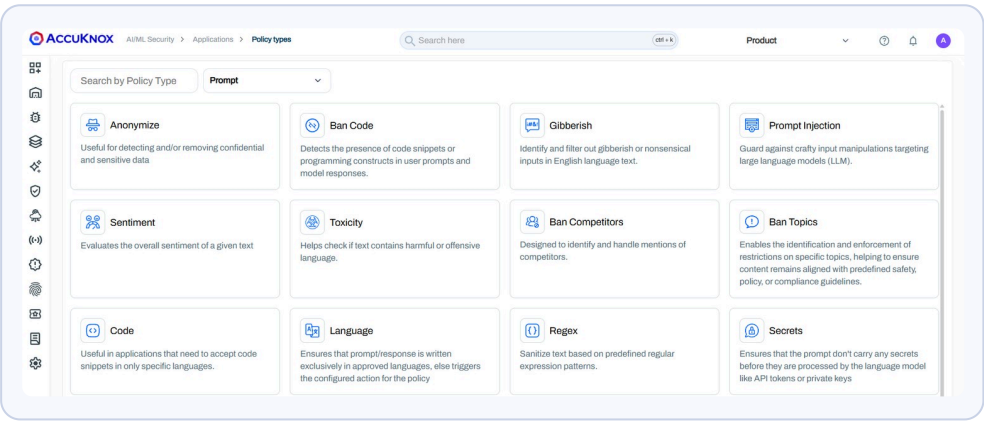

2

Set policy

Choose from 14 policy types for prompts and responses.

Or write your own rule in plain language.

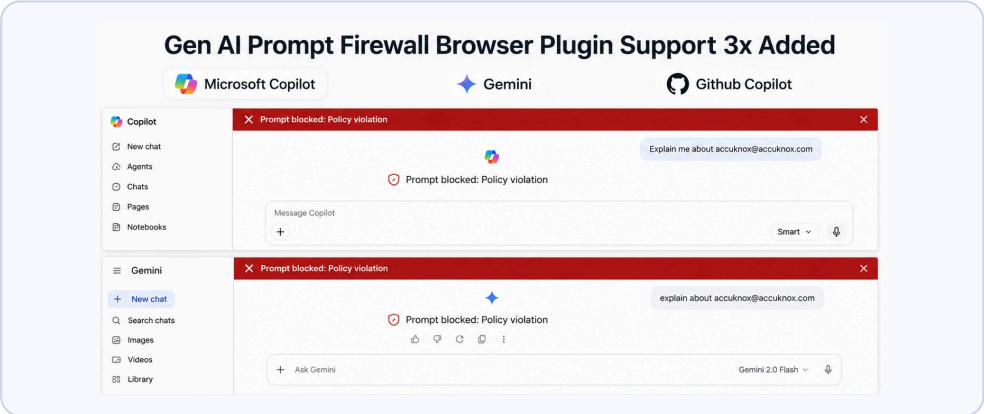

3

Enforce

A prompt that breaks policy is blocked in the page.

Covers ChatGPT, Claude, Gemini, GitHub Copilot and Microsoft Copilot.

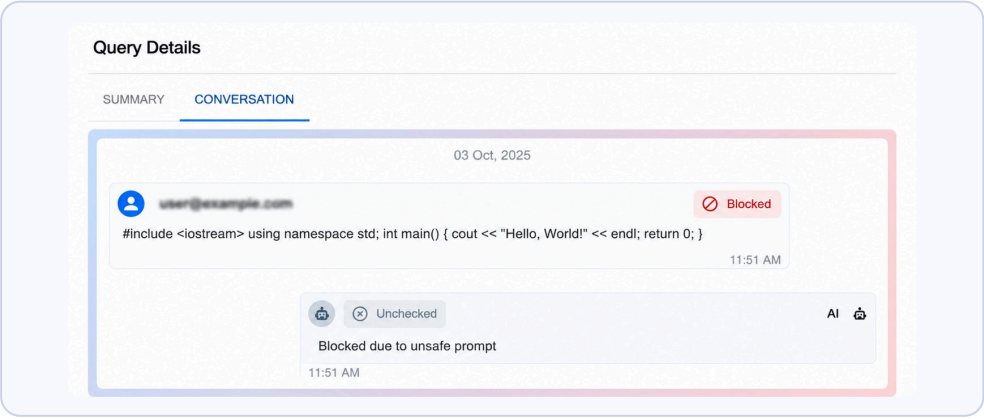

4

Investigate

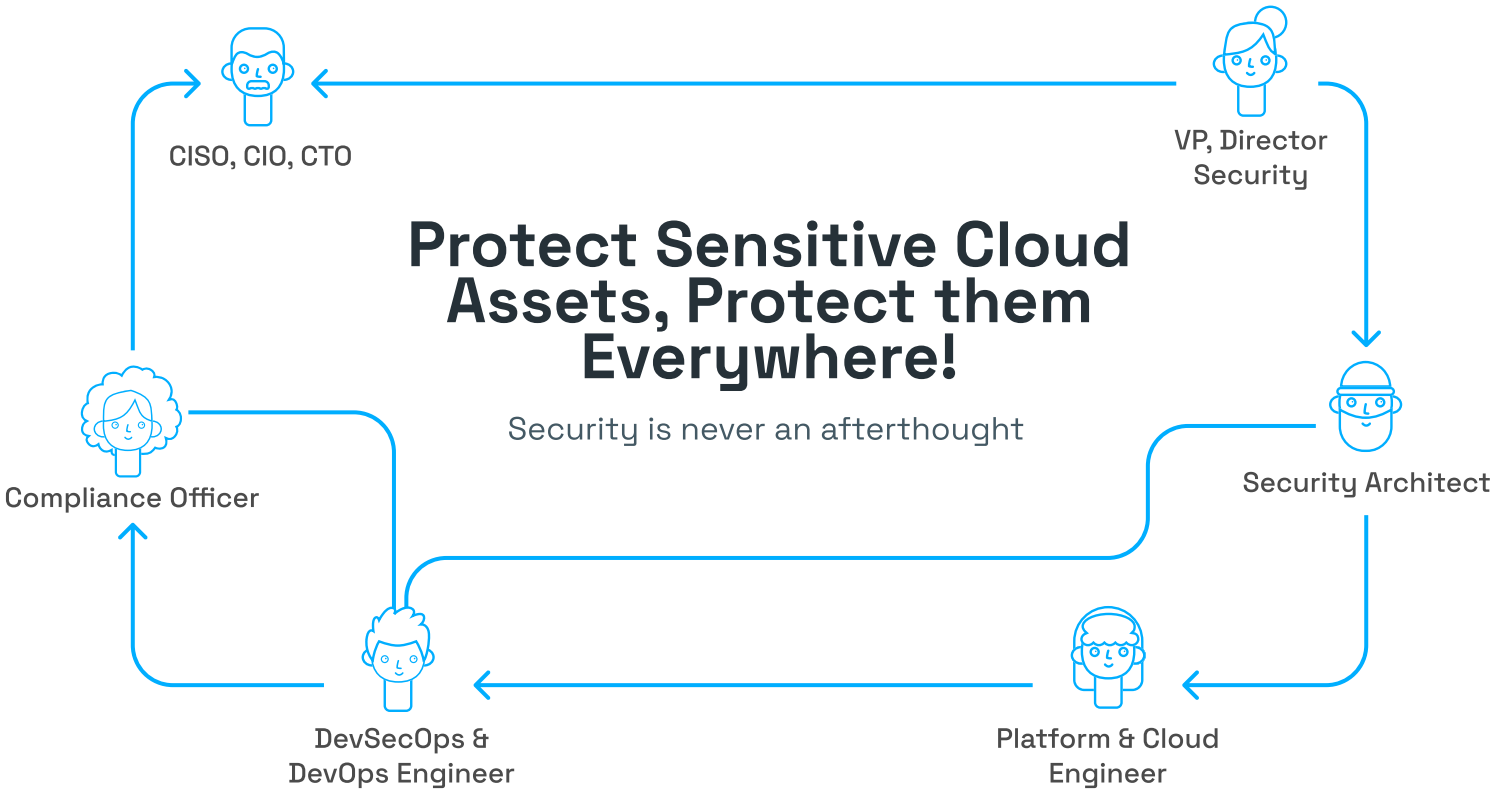

Each query shows the conversation, the policy scores and the action.

The request log exports as JSON.
